

### Philosophy

A healthy structural and functional skeleton is a foundation for the best possible esthetic image that complies with the idea: "Minimum means - maximum expression".

### Motto

Nothing gives your wings more lift than solid earth under your feet.

#### **Le Corbusier**

*People said I lacked courtesy. But I was only pointing out things that are fundamental.*

#### **Louis Kahn**

*The seminal idea of my work is the constant distinction between the areas that are served and the areas that serve.*

#### **Kenzo Tange**

*Nevertheless, the basic forms, spaces, and appearances must be logical.*

#### **Walter Gropius**

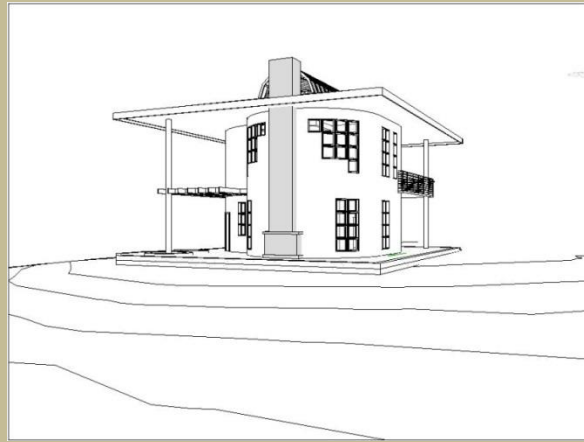

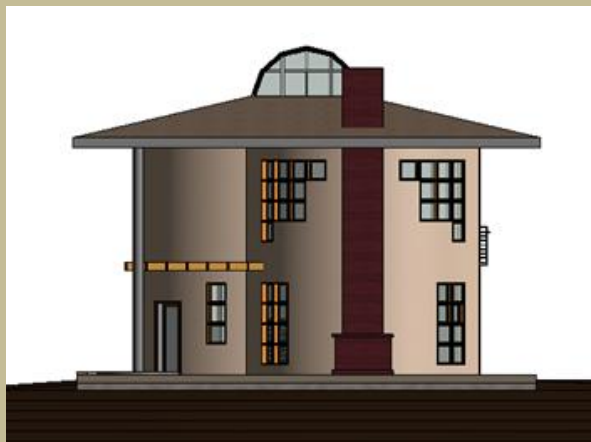

*Specialists are people who always repeat the same mistakes.*

#### **Louis H. Sullivan**

*Form ever follows function.*
